Cutting up a cake in front of an avid horde is stressful: It just never seems that you can chop things off quickly or enough enough. Enter this method, demonstrated by Australian self-teaching baker and blogger Katherine Sabbath: Using no more than a knife with a cutting board, it is able to distort the slices of a cake basically 10 even served at once. I know, we can't stop watching it either, which is probably why the mesmerizing video has pulled up more than 1.5million views on Instagram. (Sabbath, by the way, is a former high school teacher who left the profession a few years back, after his social media accounts took the cut, thanks to those big behind his creative dessert, instantly creative.) It's been a method that has been around for decades, Sabbath said TODAY food, and pros often use it to serve normal cakes. He showed the technique on a round layer cake -- you know, the kind that the rest of usually try turns in triangle-slippery corners, like a wheel in Switzerland? Well, appearance, we did it all wrong: The key is to make rectangular slices from a round cake. (Gas!) Decorate cake like a pro and expert Rich Court tipsMay 14, 201904: 30In the video, his friend is actually making the slices, and he is manure, which picks up about three slices among the cake (though you can cut that first sway-edge slices the same way, he told us.) Keep a cutting board right at angles 90°, versus the cake's side. Use a chef's knife, cut the length-wise, parallel edge of the cake, so that you get one piece long rectangular. Guide the Spirit with your knife, let it fall on the cutting board, lowering the board as you finish slicing. Cut the long rectangular slices of the same allotment. A bonus is that the portions you get from the cake are reasonable -- even if you can always come back for seconds or third, he writes. The same slide person seems to be mananging to carry on a conversation while doing the honors -- and easily serving cake for 10 in seconds issue. This is how I've always cut all on my height or wider-sized cake, Sabbath told TODAY. It's adaptable for any size served with any type of cake. As for putting a dozen five years that wants a piece with Elsa's face on it, well, sorry, but good luck with that. This post was originally published on June 27, 2017. It has since been updated.
